Introduction to
June 2022 Co-Working week

- **v1.0 release candidate is out**
  - v0.20.1 bug-fix release was released last week

  - LTS release requires changes in development workflow
    - We have to finalize PIG 23 defining the release scheme
    - We have to prepare and train for the new workflow

  - Maintenance is becoming a very significant amount of work
    - We have to simplify/automatize some tasks (e.g. releases)
    - We have to better define and distribute DevOps tasks
      - maintainers

Objectives for this week

- **Preparation of v1.0 release:**
  - Solve remaining issues (mostly bugs & clean-ups)
  -
    Final documentation effort

  - Prepare full draft of paper
    - + define authorship see PIG 24

  - Prepare for development workflow after LTS
    - dedicated meeting Wednesday afternoon

- Specific discussions on specific projects?

Organization for this week

- Regular meetings every day at 2 pm (CEST)

- Meeting topics:
  - Implementation of time-dependent spectral models for event sampling: Tuesday 2pm
  - Hands-on session to train for the new development workflow: Wednesday 2 pm
  - Feedback from LST-1 : Thursday 2pm
  - close-out meeting : Friday 2pm
  - Other discussions?

- Other meetings? Regular status?

Topics for this afternoon

- PIG 24 status - Bruno

- Status of CTAO data challenge - Fabio

- Update from HAWC - Laura

- Update on Unbinned analysis - Tim ?

- Open issues to tackle - Régis

- Other?

Issues to solve

- Open issues with v1.0 milestones
  - https://github.com/gammapy/gammapy/issues?q=is%3Aopen+is%3Aissue+milestone%3A1.0

- See Co-working week project:
