PROJECT IDEAS

Gammapy coding sprint, Erlangen July 15th, Axel Donath

BIGGER PROJECTS

➤ Fermi / HESS joint analysis tutorial (Luca?)

➤ Finish implementation of `LightCurveEstimator` (Régis?) https://github.com/gammapy/gammapy/issues/2281

➤ Implement model YAML serialisation prototype (requires discussion) (Quentin?)

➤ Implement `IRFEventDistributor` (Fabio?)

SMALLER PROJECTS

➤ Implement and unify dataset residual computation: https://github.com/gammapy/gammapy/issues/2236

➤ Implement __repr__ / __str__ for dataset classes: https://github.com/gammapy/gammapy/issues/2234

➤ Implement on / off naming scheme described in https://github.com/gammapy/gammapy/issues/2252#issuecomment-511329058

➤ Any other ideas? Talk to Christoph, Régis or me…
